***Obligatory Course:** to be selected from a list of topics offered each individual semester

****Optional Course:** to be selected from the differentiated professional courses offered at the department, and from the optional courses as well as other courses offered by other departments at the university. (If the student chooses an optional course from the courses of the differentiated optional courses offered by his own master program, the course credits may not be registered as credits for a differentiated professional course.) Optional courses may be accepted when selected from the course list offered by another university. (Credits received for the courses completed at other universities may be registered in correspondence to the general credit calculation rules of the institution.) The specific timing of the optional courses is open, however, certain courses may have prerequisites. The course grid defines how many optional course credits are needed for completing the MA degree requirements.

*** **Professional Methodology Module:** completing this module is a compulsory part of the teacher training programs (in 8 credits). The courses within this module are the following:

Objectives and Content in Visual Education; Methods and Society in Visual Education.

Completing these two courses are compulsory for those students who would like to receive a diploma in Visual Educator/Teacher Training MA.

**** Internship – to be completed in an architect or interior design office or at a studio and it should be at least 6 weeks long. The responsible person for the course schedule establishes the program for the internship in accordance with the suggestions provided by the responsible department official.
