Goal of the Course

In this photography-focused course, you will not only learn about how to use your tools and devices but acquire a mindset which helps you find the most suitable and efficient way to implement your ideas. Due to the constant improvement of technology, new tendencies and approaches are forming in photography. We need to prepare and learn to adapt our attitude to respond to the latest advancements. To do this, you will get acquainted with the fundamentals of digital image processing and retouching through lectures and exercises.

Themes and Problems Addressed in the Courses

DIGITAL WORKFLOW

INTRODUCTION / GROUPS & ASSIGNMENT

Course participants get acquainted through 5-minute presentations and a level assessment introduction. Introductory conversation to assess the students' knowledge, experience and interest. Participants form groups and receive their course assignments.

2. LECTURE: Workflow

Visit at an Art Print Lab.

- importance of a workflow
- colour calibrating your devices
- colour gamuts
- digital standards, file formats, RAW images
- DPI resolution

3. LECTURE: Workflow & Tethered shooting

Lecture: the importance of your workflow from shooting to print.

- what is a tethered photoshoot?
- why use a separate software for RAW developing
- Camera Raw
- Lightroom
- Capture One

- general tools for editing an image
- understanding histogram, levels, curves, white and colour balance
- gamma, brightness, exposure?
- learning to express and define a technical problem of an image

Groups present their ideas & moodboards for the shootings.

4. GROUP 1: TETHERED SHOOTING

Tethered shooting in the studio. Class lasts until 17:30.

5. GROUP 2: TETHERED SHOOTING

Tethered shooting in the studio. Class lasts until 17:30.

6. GROUP 3: TETHERED SHOOTING

Tethered shooting in the studio. Class lasts until 17:30. Deadline: Group 1 submits all RAW images for final composite.

7. LECTURE & GROUP 1: RETOUCHING

- What is a non-destructive workflow?
- Layers, blending modes
- Adjustment layers
- Smart objects
- Selecting, masking, path

Deadline: Group 2 submits all RAW images for final composite.

8. LECTURE & GROUP 2: RETOUCHING

- retouching
- healing brush, clone stamp
- content-aware
- liquify
- frequency separation

Deadline: Group 2 submits all RAW images for final composite.

9. LECTURE & GROUP 3: RETOUCHING

- how to adjust different images to colour match
- how to blend parts into each other

10. FINAL RETOUCH / Q & A

Final retouch of all groups' images. Preparation for printing.

 11. LECTURE: How to print an image papers, colour gamuts, technologies Offset, digital print, giclée print, special prints: UV print, sublimation, etc Proofing and colour correcting DPI resolution colour gamut 				
12. PROOFING & PRINTING Printing all groups' images in the print studio.				
Resources				
Capture One Webinars: <u>https://learn.captureone.com/webinars/</u> <u>https://www.youtube.com/c/CaptureOneDK/videos</u> Official Adobe Tutorials: <u>https://helpx.adobe.com/hu/photoshop/tutorials.html</u>				
Participant's Responsibilities				
During the semester, you will have to work in groups and produce one or a small series of composite images, starting from the idea, producing the image in the studio via tethered shooting, retouching it and printing in high quality, with maximum consciousness and control throughout the whole creative process.				
Evaluation				
In five-poin	grading	system	based	on:
 Active participation in the lectures Quality of the idea and outcome of the group task Quality & result of the retouching of 2 chosen group images
