Recommendation

Short Description

The task is to design an installation for the MA2 student graduation exhibition. The installation should be low-cost, easy to manufacture and assemble. Optionally, it could be suitable for repeated use. On one hand, the installation should be neutral to emphasize the graduation objects. On the other hand, it should be fresh, spectacular, and refer to sustainability. The size of the projects and the additional materials and mediums should also be considered.

For the first session, we request a Pinterest research on similar installation projects from everyone.
